Database Technical Documentation

Overview

This document describes the schema of a relational database used for managing various aspects of a system, including user accounts, campaigns, notifications, billing, templates, and more. Each table is detailed with its columns, data types, maximum lengths, and nullability constraints.

Table Descriptions

1. AdminEmails

Description: Stores email addresses for administrative purposes and their creation timestamps.

Column Name	Data Type	Max Length	Is Nullable	Description
Id	int	4	No	Primary key, unique identifier for the email record
AdminEmail	nvarchar	200	No	Administrative email address
CreatedAt	datetime	8	Yes	Timestamp when the email was added

2. AdminNotification

Description: Tracks notifications related to administrative actions for workspaces and channels.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the notification
workspaceName	nvarchar	510	Yes	Name of the workspace

workspaceId	int	4	Yes		Identifier of the associated workspace
channelName	nvarchar	200	Yes		Name of the channel
status	nvarchar	100	Yes		Status of the notification
createdAt	datetime	8	Yes		Timestamp when the notification was created

3. click2go_demo_request

Description: Stores demo request details for the "click2go" service.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the demo request
Name	nvarchar	200	No	Name of the requester
Email	nvarchar	200	No	Email address of the requester
Phone_Number	nvarchar	30	No	Phone number of the requester
Request_DateTime	datetime	8	Yes	Timestamp of the demo request
Status	nvarchar	100	Yes	Status of the demo request

4. clicktogo_demo_request

Description: Stores demo request details for the "clicktogo" service (similar to click2go_demo_request).

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the demo request

Name	nvarchar	200	No	Name of the requester
Email	nvarchar	200	No	Email address of the requester
Phone_Number	nvarchar	30	No	Phone number of the requester
Request_DateTime	datetime	8	Yes	Timestamp of the demo request
Status	nvarchar	100	Yes	Status of the demo request

5. clicktogowebsite_demo_request

Description: Stores demo request details for the "clicktogowebsite" service (similar to click2go_demo_request).

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the demo request
Name	nvarchar	200	No	Name of the requester
Email	nvarchar	200	No	Email address of the requester
Phone_Number	nvarchar	30	No	Phone number of the requester
Request_DateTime	datetime	8	Yes	Timestamp of the demo request
Status	nvarchar	100	Yes	Status of the demo request

6. dbo.ta_template_button_type

Description: Stores information about button types used in templates.

Column Name	Data Type	Max Length	Is Nullable	Description

button_id	int	4	No	Primary key, unique identifier for the button type
button_type	varchar	255	Yes	Type of the button
created_by	int	4	Yes	ID of the user who created the record
created_date	datetime	8	Yes	Timestamp when the record was created
updated_by	int	4	Yes	ID of the user who last updated the record
update_date	datetime	8	Yes	Timestamp of the last update

7. error_log

Description: Logs errors that occur during stored procedure execution or other operations.

Column Name	Data Type	Max Length	Is Nullable	Description
log_id	int	4	No	Primary key, unique identifier for the error log
procedure_name	nvarchar	510	Yes	Name of the procedure where the error occurred
error_message	nvarchar	-1	Yes	Description of the error
error_line	int	4	Yes	Line number where the error occurred
error_number	int	4	Yes	Error code/number
error_time	datetime	8	Yes	Timestamp when the error occurred

8. phonepe_invoices

Description: Stores invoice details for PhonePe payments, including PDF data.

Column Name	Data Type	Max Length	Is Nullable	Description
Id	int	4	No	Primary key, unique identifier for the invoice
OrderId	varchar	100	No	Unique identifier for the order
CreatedAt	datetime	8	No	Timestamp when the invoice was created
PdfBytes	varbinary	-1	No	Binary data of the invoice PDF

9. sysdiagrams

Description: Stores database diagram metadata.

Column Name	Data Type	Max Length	Is Nullable	Description
name	sysname	256	No	Name of the diagram
principal_id	int	4	No	ID of the principal (owner) of the diagram
diagram_id	int	4	No	Primary key, unique identifier for the diagram
version	int	4	Yes	Version of the diagram
definition	varbinary	-1	Yes	Binary definition of the diagram

10. ta_account_type

Description: Defines types of accounts in the system.

Column Name	Data Type	Max Length	Is Nullable	Description
account_id	tinyint	1	No	Primary key, unique identifier for the account type

account_type	nvarchar	100	No	Name of the account type
created_by	nvarchar	100	No	User who created the account type
created_date	nvarchar	2	Yes	Date when the account type was created

11. ta_admin

Description: Stores administrative user details.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the admin
email	varchar	255	No	Email address of the admin
created_at	datetime	8	Yes	Timestamp when the admin was added
updated_at	datetime	8	Yes	Timestamp of the last update

12. ta_admin_campaign_column

Description: Stores campaign column configurations for admins.

Column Name	Data Type	Max Length	Is Nullable	Description
EmailId	nvarchar	-1	No	Email identifier for the campaign
Columns	nvarchar	-1	No	Column configuration details

13. ta_admin_channel_approval

Description: Tracks channel approval statuses for workspaces.

Column Name	Data Type	Max Length	Is Nullable	Description

WorkspaceId	int	4	No	Primary key, identifier of the workspace
Channels	nvarchar	510	Yes	List of channels associated with the workspace

14. ta_admin_Notification

Description: Stores notification details for admins (similar to AdminNotification).

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the notification
workspaceName	nvarchar	510	Yes	Name of the workspace
workspaceId	int	4	Yes	Identifier of the associated workspace
channelName	nvarchar	200	Yes	Name of the channel
status	nvarchar	100	Yes	Status of the notification
createdAt	datetime	8	Yes	Timestamp when the notification was created

15. ta_adv_audience

Description: Stores audience details for advertising campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
list_id	int	4	Yes	Identifier of the audience list
contact_id	int	4	No	Primary key, unique identifier for the contact
firstname	varchar	100	Yes	First name of the contact

lastname	varchar	100	Yes	Last name of the contact	
phoneno	varchar	100	Yes	Phone number of the contact	
location	varchar	100	Yes	Location of the contact	
filename1	varchar	100	Yes	Name of an associated file	
created_date	datetime	8	Yes	Timestamp when the record was created	
createdby	varchar	100	Yes	User who created the record	
workspace_id	int	4	Yes	Identifier of the associated workspace	
listname	varchar	255	Yes	Name of the audience list	
status	varchar	100	Yes	Status of the audience record	

16. ta_adv_audience_arch

Description: Archives audience details for advertising campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
list_id	int	4	Yes	Identifier of the archived audience list
contact_id	int	4	Yes	Identifier of the archived contact
firstname	nvarchar	510	Yes	First name of the contact
lastname	nvarchar	510	Yes	Last name of the contact
phoneno	nvarchar	100	Yes	Phone number of the contact
location	nvarchar	510	Yes	Location of the contact
filename1	nvarchar	510	Yes	Name of an associated file

created_date	datetime	8	Yes	Timestamp when the record was created
createdby	nvarchar	200	Yes	User who created the record
workspace_id	int	4	Yes	Identifier of the associated workspace
listname	nvarchar	510	Yes	Name of the audience list
status	nvarchar	100	Yes	Status of the archived record
deleteddate	datetime	8	Yes	Timestamp when the record was archived

17. ta_adv_audience_failure

Description: Logs failed attempts to process audience data for advertising campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
list_id	int	4	No	Primary key, identifier of the audience list
contact_id	int	4	No	Primary key, identifier of the contact
firstname	varchar	255	Yes	First name of the contact
lastname	varchar	255	Yes	Last name of the contact
phoneno	varchar	20	No	Phone number of the contact
location	varchar	255	Yes	Location of the contact
filename1	varchar	255	Yes	Name of an associated file
created_date	datetime	8	No	Timestamp when the record was created
createdby	varchar	255	Yes	User who created the record

workspace_id	int	4	No		Identifier of the associated workspace
listname	varchar	255	Yes		Name of the audience list
status	varchar	50	No		Status of the failed record
error_message	nvarchar	-1	No		Description of the error

18. ta_adv_audience_trans

Description: Tracks transactional audience data for advertising campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
list_id	int	4	No	Primary key, identifier of the audience list
contact_id	int	4	No	Primary key, identifier of the contact
firstname	varchar	255	Yes	First name of the contact
lastname	varchar	255	Yes	Last name of the contact
phoneno	varchar	20	No	Phone number of the contact
location	varchar	255	Yes	Location of the contact
filename1	varchar	255	Yes	Name of an associated file
created_date	datetime	8	No	Timestamp when the record was created
createdby	varchar	255	Yes	User who created the record
workspace_id	int	4	No	Identifier of the associated workspace
listname	varchar	255	Yes	Name of the audience list

19. ta_advertiser_Notification

Description: Stores notifications for advertisers related to campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
Id	int	4	No	Primary key, unique identifier for the notification
WorkspaceId	int	4	Yes	Identifier of the associated workspace
CampaignId	int	4	No	Identifier of the associated campaign
CampaignName	varchar	255	No	Name of the campaign
StatusMark	varchar	50	No	Status marker for the notification
CreatedAt	datetime	8	Yes	Timestamp when the notification was created
NotificationData	nvarchar	-1	Yes	Additional notification data
NotificationType	nvarchar	510	Yes	Type of notification
Role	nvarchar	40	Yes	Role associated with the notification

20. ta_age

Description: Stores age categories for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the age category
age	varchar	255	Yes	Age range or category

21. ta_behaviour

Description: Stores behavioral categories for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the behavior
behaviour	varchar	255	Yes	Behavioral category

22. ta_billing_features

Description: Stores billing feature details.

Column Name	Data Type	Max Length	Is Nullable	Description
billing_id	int	4	Yes	Identifier for the billing record
feature_id	int	4	No	Primary key, unique identifier for the feature
features	varchar	500	Yes	Description of the feature

23. ta_billing_features_new

Description: Stores updated billing feature details, including pricing and package information.

Column Name	Data Type	Max Length	Is Nullable	Description
billing_id	int	4	No	Primary key, identifier for the billing record
messages	varchar	500	Yes	Number of messages included
price	varchar	500	Yes	Price of the feature
country_symbol	varchar	500	Yes	Currency symbol for the country
name	varchar	255	Yes	Name of the feature
url	varchar	1000	Yes	URL associated with the feature

Column Name	Data Type	Max Length	Is Nullable	Description
created_at	datetime	8	Yes	Timestamp when the record was created
updated_at	datetime	8	Yes	Timestamp of the last update
price_id	varchar	2000	Yes	Identifier for the pricing plan
per_message	varchar	2000	Yes	Cost per message
client_secret	varchar	200	Yes	Client secret for payment processing
status	nvarchar	20	Yes	Status of the feature
package_type	varchar	50	Yes	Type of billing package

24. ta_billing_features_record

Description: Records billing feature transactions.

Column Name	Data Type	Max Length	Is Nullable	Description
billing_id	int	4	No	Primary key, identifier for the billing record
messages	varchar	255	Yes	Number of messages included
price	varchar	500	Yes	Price of the feature
country_symbol	varchar	500	Yes	Currency symbol for the country
name	varchar	255	Yes	Name of the feature
receipt_url	varchar	1000	Yes	URL for the payment receipt
created_at	datetime	8	Yes	Timestamp when the record was created
expiry_date	datetime	8	Yes	Expiry date of the feature
price_id	varchar	2000	Yes	Identifier for the pricing plan

per_message	varchar	2000	Yes	Cost per message
client_secret	varchar	200	Yes	Client secret for payment processing
status	nvarchar	20	Yes	Status of the record
accountId	int	4	Yes	Identifier of the associated account
package_type	varchar	255	Yes	Type of billing package
record_id	int	4	No	Primary key, unique identifier for the record
paymentId	nvarchar	100	Yes	Identifier for the payment

25. ta_billing_list

Description: Stores billing details for various countries and features.

Column Name	Data Type	Max Length	Is Nullable	Description
country_id	int	4	Yes	Identifier of the country
billing_id	int	4	No	Primary key, identifier for the billing record
billing_name	varchar	100	Yes	Name of the billing plan
amount	decimal	9	Yes	Billing amount
created_date	datetime	8	Yes	Timestamp when the record was created
feature_id	int	4	Yes	Identifier of the associated feature
currency_name	varchar	500	Yes	Name of the currency
URL	nvarchar	2000	Yes	URL associated with the billing plan

26. ta_billing_tracking

Description: Tracks billing activities for users.

Column Name	Data Type	Max Length	Is Nullable	Description
tracking_id	int	4	No	Primary key, unique identifier for the tracking record
email	nvarchar	510	No	Email address of the user
account_id	int	4	Yes	Identifier of the associated account
total_closed_count	int	4	Yes	Total number of closed transactions
per_message	decimal	9	Yes	Cost per message
total_amount	decimal	9	Yes	Total amount spent
currency_symbol	nvarchar	100	Yes	Currency symbol
payment_date	date	3	Yes	Date of payment
last_campaign_end_date	date	3	Yes	End date of the last campaign
last_updated	datetime	8	Yes	Timestamp of the last update
userid	varchar	50	Yes	Identifier of the user

27. ta_blocked_contacts

Description: Stores details of blocked contacts.

Column Name	Data Type	Max Length	Is Nullable	Description

id	int	4	No	Primary key, unique identifier for the blocked contact
from_phone_id	varchar	255	Yes	Phone ID of the sender
recipient_phone_number	varchar	255	Yes	Phone number of the recipient
reason	varchar	255	Yes	Reason for blocking the contact

28. ta_business_parameter

Description: Stores business parameters associated with campaigns and contacts.

Column Name	Data Type	Max Length	Is Nullable	Description
contact_id	int	4	No	Primary key, identifier of the contact
campaign_id	int	4	Yes	Identifier of the associated campaign
list_id	int	4	Yes	Identifier of the associated audience list
phoneno1	int	4	Yes	First phone number
phoneno2	int	4	Yes	Second phone number
phoneno3	int	4	Yes	Third phone number
parameter1	varchar	255	Yes	Custom parameter 1
parameter3	varchar	255	Yes	Custom parameter 3
parameter4	varchar	255	Yes	Custom parameter 4
parameter5	varchar	255	Yes	Custom parameter 5
parameter6	varchar	255	Yes	Custom parameter 6
parameter7	varchar	255	Yes	Custom parameter 7

parameter8	varchar	255	Yes	Custom parameter 8
parameter9	varchar	255	Yes	Custom parameter 9
parameter10	varchar	255	Yes	Custom parameter 10
parameter11	varchar	255	Yes	Custom parameter 11
parameter12	varchar	255	Yes	Custom parameter 12
parameter13	varchar	255	Yes	Custom parameter 13
parameter14	varchar	255	Yes	Custom parameter 14
parameter15	varchar	255	Yes	Custom parameter 15
parameter16	varchar	255	Yes	Custom parameter 16
parameter17	varchar	255	Yes	Custom parameter 17
parameter18	varchar	255	Yes	Custom parameter 18
parameter19	varchar	255	Yes	Custom parameter 19
parameter20	varchar	255	Yes	Custom parameter 20
created_by	int	4	Yes	ID of the user who created the record
created_date	datetime	8	Yes	Timestamp when the record was created
updated_by	int	4	Yes	ID of the user who last updated the record
updated_date	datetime	8	Yes	Timestamp of the last update

29. ta_campaign_column

Description: Stores column configurations for campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
WorkspaceId	int	4	No	Primary key, identifier of the workspace
Columns	nvarchar	-1	No	Column configuration details

30. ta_campaign_column_backup

Description: Backup of campaign column configurations.

Column Name	Data Type	Max Length	Is Nullable	Description
WorkspaceId	varchar	255	No	Primary key, identifier of the workspace
Columns	text	16	No	Column configuration details (backup)

31. ta_campaign_contacts

Description: Stores contact details for campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
list_id	int	4	Yes	Identifier of the audience list
contact_id	int	4	Yes	Identifier of the contact
firstname	varchar	100	Yes	First name of the contact
lastname	varchar	100	Yes	Last name of the contact
phoneno	varchar	100	Yes	Phone number of the contact
location	varchar	100	Yes	Location of the contact
filename1	varchar	100	Yes	Name of an associated file

created_date	datetime	8	Yes	Timestamp when the record was created	
createdby	varchar	100	Yes	User who created the record	
campaign_id	int	4	Yes	Identifier of the associated campaign	
status	varchar	100	Yes	Status of the contact in the campaign	
last_dialled_date	datetime	8	Yes	Timestamp of the last dial attempt	
DayNumber	int	4	Yes	Day number in the campaign sequence	

32. ta_campaign_details

Description: Stores detailed information about campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
campaign_id	int	4	No	Primary key, unique identifier for the campaign
campaign_name	varchar	255	Yes	Name of the campaign
campaign_budget	varchar	255	Yes	Budget allocated for the campaign
channel_type	int	4	Yes	Type of channel used (e.g., SMS, email)
target_country	nvarchar	-1	Yes	Target country for the campaign
roaming_country	nvarchar	-1	Yes	Roaming country for the campaign
start_date_time	datetime	8	Yes	Start timestamp of the campaign

end_date_time	datetime	8	Yes		End timestamp of the campaign
status	varchar	255	Yes		Status of the campaign
template_name	varchar	255	Yes		Name of the template used
created_by	int	4	Yes		ID of the user who created the campaign
created_date	datetime	8	Yes		Timestamp when the campaign was created
updated_by	int	4	Yes		ID of the user who last updated the campaign
update_date	datetime	8	Yes		Timestamp of the last update
sent	int	4	Yes		Number of messages sent
workspace_id	int	4	Yes		Identifier of the associated workspace
list_id	int	4	Yes		Identifier of the associated audience list
device_id	int	4	Yes		Identifier of the associated device
delivered	nvarchar	510	Yes		Number of messages delivered
read_campaign	nvarchar	510	Yes		Number of messages read
c_t_r	nvarchar	510	Yes		Click-through rate
delivery_rate	nvarchar	510	Yes		Delivery rate
button_click	nvarchar	510	Yes		Number of button clicks
age	int	4	Yes		Age group targeted

gender	int	4	Yes	Gender targeted
income_level	int	4	Yes	Income level targeted
location	int	4	Yes	Location targeted
interests	int	4	Yes	Interests targeted
behaviours	int	4	Yes	Behaviors targeted
os_device	int	4	Yes	Operating system/device targeted
f_campaign_budget	varchar	255	Yes	Final campaign budget
f_start_date_time	datetime	8	Yes	Final start timestamp
f_end_date_time	datetime	8	Yes	Final end timestamp
isAdminApproved	varchar	255	Yes	Admin approval status
isOperatorApproved	varchar	255	Yes	Operator approval status
budget_and_schedule	varchar	255	Yes	Budget and schedule details
message_frequency	varchar	255	Yes	Frequency of messages
sequential_delivery	varchar	255	Yes	Sequential delivery settings
prevent_duplicate_messages	varchar	255	Yes	Duplicate message prevention settings
daily_recipient_limit	int	4	Yes	Daily recipient limit
delivery_start_time	datetime	8	Yes	Delivery start timestamp
delivery_end_time	datetime	8	Yes	Delivery end timestamp
smpp_id	int	4	Yes	SMPP connection ID
sms_number	varchar	255	Yes	SMS number used

sms_connection_id	int	4	Yes	SMS connection ID
processing_status	varchar	255	Yes	Processing status of the campaign
campaign_existing_budget	decimal	9	Yes	Existing budget for the campaign
amount_spent	decimal	9	Yes	Amount spent on the campaign
currency_symbol	nvarchar	20	Yes	Currency symbol
currency_name	varchar	50	Yes	Currency name
country_name	varchar	50	Yes	Country name

33. ta_campaign_details_archive

Description: Archives campaign details (similar to ta_campaign_details).

Column Name	Data Type	Max Length	Is Nullable	Description
campaign_id	int	4	Yes	Identifier of the archived campaign
campaign_name	varchar	255	Yes	Name of the campaign
campaign_budget	varchar	255	Yes	Budget allocated for the campaign
channel_type	int	4	Yes	Type of channel used
target_country	nvarchar	-1	Yes	Target country for the campaign
roaming_country	nvarchar	-1	Yes	Roaming country for the campaign

start_date_time	datetime	8	Yes		Start timestamp of the campaign
end_date_time	datetime	8	Yes		End timestamp of the campaign
status	varchar	255	Yes		Status of the campaign
template_name	varchar	255	Yes		Name of the template used
created_by	int	4	Yes		ID of the user who created the campaign
created_date	datetime	8	Yes		Timestamp when the campaign was created
updated_by	int	4	Yes		ID of the user who last updated the campaign
update_date	datetime	8	Yes		Timestamp of the last update
sent	int	4	Yes		Number of messages sent
workspace_id	int	4	Yes		Identifier of the associated workspace
list_id	int	4	Yes		Identifier of the associated audience list
device_id	int	4	Yes		Identifier of the associated device
delivered	nvarchar	510	Yes		Number of messages delivered
read_campaign	nvarchar	510	Yes		Number of messages read
c_t_r	nvarchar	510	Yes		Click-through rate
delivery_rate	nvarchar	510	Yes		Delivery rate
button_click	nvarchar	510	Yes		Number of button clicks

age	int	4	Yes	Age group targeted
gender	int	4	Yes	Gender targeted
income_level	int	4	Yes	Income level targeted
location	int	4	Yes	Location targeted
interests	int	4	Yes	Interests targeted
behaviours	int	4	Yes	Behaviors targeted
os_device	int	4	Yes	Operating system/device targeted
f_campaign_budget	varchar	255	Yes	Final campaign budget
f_start_date_time	datetime	8	Yes	Final start timestamp
f_end_date_time	datetime	8	Yes	Final end timestamp
isAdminApproved	varchar	255	Yes	Admin approval status
isOperatorApproved	varchar	255	Yes	Operator approval status
budget_and_schedule	varchar	255	Yes	Budget and schedule details
message_frequency	varchar	255	Yes	Frequency of messages
sequential_delivery	varchar	255	Yes	Sequential delivery settings
prevent_duplicate_messages	varchar	255	Yes	Duplicate message prevention settings
daily_recipient_limit	int	4	Yes	Daily recipient limit
delivery_start_time	datetime	8	Yes	Delivery start timestamp
delivery_end_time	datetime	8	Yes	Delivery end timestamp
smpp_id	int	4	Yes	SMPP connection ID

sms_number	varchar	255	Yes	SMS number used
sms_connection_id	int	4	Yes	SMS connection ID
processing_status	varchar	255	Yes	Processing status of the campaign
campaign_existing_budget	decimal	9	Yes	Existing budget for the campaign
amount_spent	decimal	9	Yes	Amount spent on the campaign
currency_symbol	nvarchar	20	Yes	Currency symbol
currency_name	varchar	50	Yes	Currency name
country_name	varchar	50	Yes	Country name

34. ta_campaign_expense_details

Description: Tracks expense details for campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
campaign_id	int	4	No	Primary key, identifier of the campaign
workspace_id	int	4	Yes	Identifier of the associated workspace
campaign_budget	decimal	9	Yes	Budget allocated for the campaign
campaign_existing_budget	decimal	9	Yes	Existing budget for the campaign
campaign_amount_spent	decimal	9	Yes	Amount spent on the campaign

message_sent	decimal	9		Yes	Number of messages sent
start_date_time	datetime	8		Yes	Start timestamp of the campaign
end_date_time	datetime	8		Yes	End timestamp of the campaign
status	varchar	255		Yes	Status of the campaign
campaign_channel_type	int	4		Yes	Type of channel used

35. ta_campaign_operator_approvals

Description: Stores operator approval details for campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the approval
campaign_id	int	4	No	Identifier of the associated campaign
operator_id	int	4	No	Identifier of the operator
country	nvarchar	200	No	Country associated with the approval
isOperatorApproved	varchar	50	Yes	Operator approval status
approved_at	datetime	8	Yes	Timestamp when the approval was granted

36. ta_campaign_operator_failure

Description: Logs failures related to campaign operator processing.

Column Name	Data Type	Max Length	Is Nullable	Description
failure_id	int	4	No	Primary key, unique identifier for the failure
eventTimeStamp	nvarchar	510	Yes	Timestamp of the failure event
msisdn	varchar	15	Yes	Mobile number involved
mcc	int	4	Yes	Mobile country code
mnc	int	4	Yes	Mobile network code
countryName	varchar	100	Yes	Name of the country
errorMessage	varchar	500	Yes	Description of the error
fileName	varchar	255	Yes	Name of the associated file
workspace_id	int	4	Yes	Identifier of the associated workspace
created_date	datetime	8	Yes	Timestamp when the failure was logged

37. ta_campaign_sent

Description: Tracks the number of messages sent per campaign across different channels.

Column Name	Data Type	Max Length	Is Nullable	Description
campaign_id	int	4	Yes	Identifier of the campaign
email	int	4	Yes	Number of emails sent
sms	int	4	Yes	Number of SMS sent
push_notification	int	4	Yes	Number of push notifications sent

rcs_messages	int	4	Yes	Number of RCS messages sent
whatsapp	int	4	Yes	Number of WhatsApp messages sent
sent_date	date	3	Yes	Date when messages were sent
click2go	int	4	Yes	Number of click2go messages sent

38. ta_campaign_sent_archive

Description: Archives the number of messages sent per campaign (similar to ta_campaign_sent).

Column Name	Data Type	Max Length	Is Nullable	Description
campaign_id	int	4	Yes	Identifier of the archived campaign
email	int	4	Yes	Number of emails sent
sms	int	4	Yes	Number of SMS sent
push_notification	int	4	Yes	Number of push notifications sent
rcs_messages	int	4	Yes	Number of RCS messages sent
whatsapp	int	4	Yes	Number of WhatsApp messages sent
sent_date	date	3	Yes	Date when messages were sent
click2go	int	4	Yes	Number of click2go messages sent

39. ta_campaign_type

Description: Defines types of campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description

channel_id	int	4	No	Primary key, unique identifier for the campaign type
channel_type	nvarchar	100	No	Type of campaign channel
created_by	nvarchar	100	No	User who created the campaign type
created_date	nvarchar	2	Yes	Date when the campaign type was created
channel_description	nvarchar	-1	Yes	Description of the campaign channel
phone_id	varchar	255	Yes	Phone ID associated with the channel

40. ta_content_type

Description: Defines types of content used in campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
content_id	int	4	No	Primary key, unique identifier for the content type
content_name	nvarchar	100	No	Name of the content type
created_by	nvarchar	100	No	User who created the content type
created_date	datetime	8	Yes	Timestamp when the content type was created
updated_by	nvarchar	100	Yes	User who last updated the content type
updated_date	datetime	8	Yes	Timestamp of the last update

41. ta_country_details

Description: Stores country details, including codes and names.

Column Name	Data Type	Max Length	Is Nullable	Description
country_id	int	4	No	Primary key, unique identifier for the country
country_shortname	nvarchar	100	No	Short name of the country
country_code	int	4	No	Country code
country_name	nvarchar	-1	No	Full name of the country

42. ta_country_list

Description: Stores a list of countries with currency details.

Column Name	Data Type	Max Length	Is Nullable	Description
country_id	int	4	No	Primary key, unique identifier for the country
country_name	varchar	255	Yes	Name of the country
created_date	datetime	8	Yes	Timestamp when the record was created
symbol	nvarchar	510	Yes	Currency symbol
currency_name	varchar	500	Yes	Name of the currency

43. ta_currency_details

Description: Stores currency details.

Column Name	Data Type	Max Length	Is Nullable	Description

id	int	4	No	Primary key, unique identifier for the currency
symbol	varchar	255	Yes	Currency symbol
name	varchar	255	Yes	Currency name
created_date	datetime	8	Yes	Timestamp when the record was created

44. ta_device

Description: Stores device types for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the device
device	varchar	255	Yes	Device type

45. ta_email_domains

Description: Stores email domain details.

Column Name	Data Type	Max Length	Is Nullable	Description
domain_id	int	4	No	Primary key, unique identifier for the domain
domain_name	nvarchar	510	No	Email domain name

46. ta_gender

Description: Stores gender categories for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description

id	int	4	No	Primary key, unique identifier for the gender
gender	varchar	255	Yes	Gender category

47. ta_income_level

Description: Stores income level categories for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the income level
income_level	varchar	255	Yes	Income level category

48. ta_industry_list

Description: Stores a list of industries.

Column Name	Data Type	Max Length	Is Nullable	Description
industry_id	int	4	No	Primary key, unique identifier for the industry
industry_name	nvarchar	510	No	Name of the industry
created_date	datetime	8	Yes	Timestamp when the record was created

49. ta_industry_type

Description: Defines industry types.

Column Name	Data Type	Max Length	Is Nullable	Description

industry_id	tinyint	1	No	Primary key, unique identifier for the industry type
industry_name	nvarchar	100	No	Name of the industry type
created_by	nvarchar	100	No	User who created the industry type
created_date	nvarchar	2	Yes	Date when the industry type was created

50. ta_interest

Description: Stores interest categories for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the interest
interest	varchar	255	Yes	Interest category

51. ta_language_list

Description: Stores a list of languages.

Column Name	Data Type	Max Length	Is Nullable	Description
language_id	int	4	No	Primary key, unique identifier for the language
language_name	nvarchar	100	No	Name of the language
created_by	nvarchar	100	No	User who created the language record
created_date	datetime	8	Yes	Timestamp when the record was created

language_code	varchar	255	Yes	Language code

52. ta_location

Description: Stores location details for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the location
location	varchar	255	Yes	Location name
city	nvarchar	510	Yes	City name

53. ta_logo

Description: Stores logo images and metadata.

Column Name	Data Type	Max Length	Is Nullable	Description
logo_id	int	4	No	Primary key, unique identifier for the logo
mapping_id	int	4	Yes	Identifier for the mapping
image	nvarchar	-1	No	Logo image data
created_by	nvarchar	510	Yes	User who created the logo
created_date	datetime	8	Yes	Timestamp when the logo was created
updated_by	nvarchar	510	Yes	User who last updated the logo
updated_date	datetime	8	Yes	Timestamp of the last update
mapping_name	varchar	255	Yes	Name of the mapping

54. ta_members

Description: Stores membership details for workspaces.

Column Name	Data Type	Max Length	Is Nullable	Description
member_id	int	4	No	Primary key, unique identifier for the member
workspace_id	int	4	Yes	Identifier of the associated workspace
first_name	varchar	255	Yes	First name of the member
last_name	varchar	255	Yes	Last name of the member
email	varchar	255	Yes	Email address of the member
role	int	4	Yes	Role ID of the member
joined_at	datetime	8	Yes	Timestamp when the member joined
invited_at	datetime	8	Yes	Timestamp when the member was invited
status	varchar	255	Yes	Status of the member
is_accepted	varchar	255	Yes	Whether the invitation was accepted
invited_by	varchar	255	Yes	User who invited the member
personal_id	int	4	Yes	Personal ID of the member
expires_at	datetime	8	Yes	Expiry timestamp for the membership
is_account_active	varchar	255	Yes	Whether the account is active

55. ta_meta_templates

Description: Stores metadata for templates used in campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
template_id	varchar	255	Yes	Identifier of the template
template_name	varchar	255	Yes	Name of the template
language	varchar	255	Yes	Language of the template
status	varchar	255	Yes	Status of the template
category	varchar	255	Yes	Category of the template
subcategory	varchar	255	Yes	Subcategory of the template
components	nvarchar	-1	Yes	Components of the template
channel_type	int	4	Yes	Type of channel used
last_updated	datetime	8	Yes	Timestamp of the last update
workspace_id	int	4	Yes	Identifier of the associated workspace
mediaBase64	nvarchar	-1	Yes	Base64-encoded media data
IsFirstEdit	bit	1	Yes	Whether this is the first edit of the template
sender_id	varchar	25	Yes	Sender ID for the template
message_content	varchar	-1	Yes	Content of the message
sms_template_id	varchar	255	Yes	SMS template ID

56. ta_meta_templates_archive

Description: Archives metadata for templates (similar to ta_meta_templates).

Column Name	Data Type	Max Length	Is Nullable	Description
template_id	varchar	255	Yes	Identifier of the archived template
template_name	varchar	255	Yes	Name of the template
language	varchar	255	Yes	Language of the template
status	varchar	255	Yes	Status of the template
category	varchar	255	Yes	Category of the template
subcategory	varchar	255	Yes	Subcategory of the template
components	nvarchar	-1	Yes	Components of the template
channel_type	int	4	Yes	Type of channel used
last_updated	datetime	8	Yes	Timestamp of the last update
workspace_id	int	4	Yes	Identifier of the associated workspace
mediaBase64	nvarchar	-1	Yes	Base64-encoded media data
IsFirstEdit	bit	1	Yes	Whether this is the first edit of the template
sender_id	varchar	50	Yes	Sender ID for the template
message_content	varchar	-1	Yes	Content of the message
sms_template_id	varchar	255	Yes	SMS template ID

57. ta_notification_settings

Description: Stores notification settings for users in workspaces.

Column Name	Data Type	Max Length	Is Nullable	Description
notification_id	int	4	No	Primary key, unique identifier for the notification setting
workspace_id	int	4	Yes	Identifier of the associated workspace
user_id	int	4	Yes	Identifier of the user
notification_data	nvarchar	-1	Yes	Notification settings data

58. ta_operator_contacts

Description: Stores operator contact details for campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
list_id	int	4	Yes	Identifier of the audience list
contact_id	int	4	Yes	Identifier of the contact
eventTimeStamp	nvarchar	400	Yes	Timestamp of the operator contact event
msisdn	varchar	100	Yes	Mobile number
mcc	int	4	Yes	Mobile country code
mnc	int	4	Yes	Mobile network code
countryName	varchar	100	Yes	Name of the country
created_date	datetime	8	Yes	Timestamp when the record was created
createdby	varchar	100	Yes	User who created the record
status	varchar	100	Yes	Status of the contact

workspace_id	int	4	Yes	Identifier of the associated workspace
updated_date	datetime	8	Yes	Timestamp of the last update
fileName	varchar	255	Yes	Name of the associated file

59. ta_os_device

Description: Stores operating system and device types for targeting purposes.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the OS/device
os_device	varchar	255	Yes	Operating system or device type

60. ta_Payments

Description: Stores payment details for user accounts.

Column Name	Data Type	Max Length	Is Nullable	Description
Id	int	4	No	Primary key, unique identifier for the payment
PaymentId	nvarchar	100	No	Unique identifier for the payment
Amount	decimal	9	No	Payment amount
Status	nvarchar	40	No	Status of the payment
PaymentDate	datetime	8	No	Timestamp of the payment
receipturl	varchar	200	Yes	URL for the payment receipt
email	varchar	100	Yes	Email address of the user

currency	varchar	100	Yes	Currency of the payment
product_name	varchar	200	Yes	Name of the product
package_type	varchar	100	Yes	Type of package
plan_name	varchar	50	Yes	Name of the plan
accountId	int	4	Yes	Identifier of the associated account
OrderId	varchar	50	Yes	Order ID for the payment
PaymentType	varchar	20	Yes	Type of payment

61. ta_Payments_Archive

Description: Archives payment details (similar to ta_Payments).

Column Name	Data Type	Max Length	Is Nullable	Description
Id	int	4	Yes	Identifier of the archived payment
PaymentId	nvarchar	100	No	Unique identifier for the payment
Amount	decimal	9	No	Payment amount
Status	nvarchar	40	No	Status of the payment
PaymentDate	datetime	8	No	Timestamp of the payment
receipturl	varchar	200	Yes	URL for the payment receipt
email	varchar	100	Yes	Email address of the user
currency	varchar	100	Yes	Currency of the payment
product_name	varchar	200	Yes	Name of the product
package_type	varchar	100	Yes	Type of package

plan_name	varchar	255	Yes	Name of the plan	
accountId	int	4	Yes	Identifier of the associated account	

62. ta_Payments_history

Description: Stores payment history for user accounts.

Column Name	Data Type	Max Length	Is Nullable	Description
accountid	int	4	Yes	Identifier of the account
email	varchar	255	Yes	Email address of the user
plan_name	varchar	255	Yes	Name of the plan
plan_id	int	4	Yes	Identifier of the plan
currency	varchar	255	Yes	Currency of the payment
amount	decimal	9	Yes	Payment amount
messages	varchar	255	Yes	Number of messages included
per_message	varchar	255	Yes	Cost per message
created_date	datetime	8	Yes	Timestamp when the record was created
package_type	varchar	255	Yes	Type of package

63. ta_reach_people_from

Description: Stores source countries for campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description

country_id	int	4	No	Primary key, unique identifier for the country
country_name	varchar	255	Yes	Name of the source country

64. ta_reach_people_to

Description: Stores target countries for campaigns.

Column Name	Data Type	Max Length	Is Nullable	Description
country_id	int	4	No	Primary key, unique identifier for the country
country_name	varchar	255	Yes	Name of the target country

65. ta_roles

Description: Defines roles and their permissions.

Column Name	Data Type	Max Length	Is Nullable	Description
role_id	int	4	No	Primary key, unique identifier for the role
role_name	varchar	255	Yes	Name of the role
permissions	nvarchar	-1	Yes	Permissions associated with the role

66. ta_sms_connections

Description: Stores SMS connection configurations.

Column Name	Data Type	Max Length	Is Nullable	Description

connection_id	int	4	No	Primary key, unique identifier for the SMS connection
channel_name	varchar	255	Yes	Name of the channel
type	varchar	255	Yes	Type of connection
host	varchar	255	Yes	Host address for the connection
port	int	4	Yes	Port number
system_id	varchar	255	Yes	System ID for the connection
password	varchar	255	Yes	Password for the connection
created_date	datetime	8	Yes	Timestamp when the connection was created
server_id	int	4	Yes	Identifier of the associated server
binding_ton	int	4	Yes	Binding type of number
binding_npi	int	4	Yes	Binding number plan indicator
sender_ton	int	4	Yes	Sender type of number
sender_npi	int	4	Yes	Sender number plan indicator
destination_ton	int	4	Yes	Destination type of number
destination_npi	int	4	Yes	Destination number plan indicator
sms_short_codes	nvarchar	-1	Yes	SMS short codes
bind_mode	int	4	Yes	Bind mode for the connection
system_type	varchar	255	Yes	System type
address_range	varchar	255	Yes	Address range for the connection
transport_protocol	varchar	255	Yes	Transport protocol used

use_ssl	int	4	Yes	Whether SSL is used
data_coding	int	4	Yes	Data coding scheme
character_encoding	varchar	255	Yes	Character encoding used
service_type	varchar	255	Yes	Service type

67. ta_sms_phonenumbers

Description: Stores SMS phone numbers.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the phone number
phone_name	varchar	255	Yes	Name of the phone number
phone_number	varchar	255	No	Phone number
workspace_id	int	4	Yes	Identifier of the associated workspace
created_date	datetime	8	Yes	Timestamp when the record was created
last_updated_date	datetime	8	Yes	Timestamp of the last update

68. ta_sms_servers

Description: Stores SMS server details.

Column Name	Data Type	Max Length	Is Nullable	Description
server_id	int	4	No	Primary key, unique identifier for the server

server_name	varchar	255		Yes	Name of the server
server_url	varchar	255		Yes	URL of the server

69. ta_telco_details

Description: Stores details of telecommunications providers.

Column Name	Data Type	Max Length	Is Nullable	Description
telco_id	int	4	No	Primary key, unique identifier for the telco
telco_name	varchar	255	Yes	Name of the telecommunications provider
status	varchar	255	Yes	Status of the telco
recipients	int	4	Yes	Number of recipients
created_by	varchar	255	Yes	User who created the record
created_date	datetime	8	Yes	Timestamp when the record was created
updated_by	varchar	255	Yes	User who last updated the record
update_date	datetime	8	Yes	Timestamp of the last update

70. ta_template_button_type

Description: Stores button types for templates (duplicate of dbo.ta_template_button_type).

Column Name	Data Type	Max Length	Is Nullable	Description
button_id	int	4	No	Primary key, unique identifier for the button type

button_type	varchar	255	Yes	Type of the button
created_by	int	4	Yes	ID of the user who created the record
created_date	datetime	8	Yes	Timestamp when the record was created
updated_by	int	4	Yes	ID of the user who last updated the record
update_date	datetime	8	Yes	Timestamp of the last update

71. ta_template_details

Description: Stores detailed information about templates.

Column Name	Data Type	Max Length	Is Nullable	Description
template_id	int	4	No	Primary key, unique identifier for the template
platform_name	int	4	Yes	Identifier of the platform
template_name	varchar	255	Yes	Name of the template
template_language	int	4	Yes	Language ID of the template
template_header	varchar	255	Yes	Header of the template
template_body	varchar	255	Yes	Body of the template
template_footer	varchar	255	Yes	Footer of the template
components	nvarchar	-1	Yes	Components of the template
button_type	varchar	255	Yes	Type of button used
button_text	varchar	255	Yes	Text of the button

created_by	int	4	Yes	ID of the user who created the template
created_date	datetime	8	Yes	Timestamp when the template was created
updated_by	int	4	Yes	ID of the user who last updated the template
updated_date	datetime	8	Yes	Timestamp of the last update
status	varchar	100	Yes	Status of the template
URLType	varchar	255	Yes	Type of URL used
WebsiteURL	varchar	255	Yes	Website URL associated with the template
content_id	int	4	Yes	Identifier of the content type
workspace_id	int	4	Yes	Identifier of the associated workspace

72. ta_template_platform

Description: Stores platform details for templates.

Column Name	Data Type	Max Length	Is Nullable	Description
platform_id	int	4	No	Primary key, unique identifier for the platform
platform_name	varchar	255	Yes	Name of the platform
created_by	int	4	Yes	ID of the user who created the platform
created_date	datetime	8	Yes	Timestamp when the platform was created

updated_by	int	4	Yes	ID of the user who last updated the platform
update_date	datetime	8	Yes	Timestamp of the last update

73. ta_user_account_info

Description: Stores user account information.

Column Name	Data Type	Max Length	Is Nullable	Description
user_account_id	int	4	No	Primary key, unique identifier for the user account
email	varchar	255	Yes	Email address of the user
phone_number	int	4	Yes	Phone number of the user
email_verified	varchar	255	Yes	Whether the email is verified
phone_verified	varchar	1	Yes	Whether the phone number is verified
password	varchar	255	Yes	Password for the account
status	varchar	255	Yes	Status of the account

74. ta_user_personal_info

Description: Stores personal information for users.

Column Name	Data Type	Max Length	Is Nullable	Description
user_personal_id	int	4	No	Primary key, unique identifier for the user
account_id	int	4	No	Identifier of the associated account

first_name	varchar	255	Yes	First name of the user
last_name	varchar	255	Yes	Last name of the user
email_subcription	varchar	255	Yes	Email subscription status
alternate_number	int	4	Yes	Alternate phone number
city	varchar	255	Yes	City of the user
country	varchar	255	Yes	Country of the user
address	varchar	255	Yes	Address of the user
language_preference	varchar	255	Yes	Language preference
gender	varchar	255	Yes	Gender of the user
dateobirth	date	3	Yes	Date of birth
status	varchar	255	Yes	Status of the user
created_by	int	4	Yes	ID of the user who created the record
created_date	datetime	8	Yes	Timestamp when the record was created
updated_by	int	4	Yes	ID of the user who last updated the record
updated_date	datetime	8	Yes	Timestamp of the last update
email	varchar	50	Yes	Email address of the user

75. ta_User_Wallet

Description: Stores wallet details for users.

Column Name	Data Type	Max Length	Is Nullable	Description
email	nvarchar	510	Yes	Email address of the user
amount	decimal	9	No	Wallet balance
last_purchased_plan	nvarchar	510	Yes	Last purchased plan
per_message_cost	decimal	9	Yes	Cost per message
available_messages	bigint	8	Yes	Number of available messages
currency	nvarchar	20	Yes	Currency of the wallet
sent_messages	int	4	Yes	Number of messages sent
total_purchased_messages	bigint	8	Yes	Total messages purchased
last_debited_date	datetime	8	Yes	Timestamp of the last debit
amount_spent	decimal	9	Yes	Total amount spent
accountId	int	4	Yes	Identifier of the associated account
last_purchased_plan_type	varchar	255	Yes	Type of the last purchased plan
expiry_date	date	3	Yes	Expiry date of the wallet
wallet_status	nvarchar	510	Yes	Status of the wallet

76. ta_user_workspace_info

Description: Stores workspace information for users.

Column Name	Data Type	Max Length	Is Nullable	Description
workspace_info_id	int	4	No	Primary key, unique identifier for the workspace
personal_info_id	int	4	No	Identifier of the associated personal info
workspace_name	varchar	255	Yes	Name of the workspace
billing_country	int	4	Yes	Identifier of the billing country
workspace_industry	int	4	Yes	Identifier of the industry
workspace_type	int	4	Yes	Type of workspace
status	varchar	255	Yes	Status of the workspace
created_by	int	4	Yes	ID of the user who created the workspace
created_date	datetime	8	Yes	Timestamp when the workspace was created
updated_by	int	4	Yes	ID of the user who last updated the workspace
updated_date	datetime	8	Yes	Timestamp of the last update
address	nvarchar	-1	Yes	Address of the workspace
Alternate_billing_country	int	4	Yes	Alternate billing country ID
sms_short_codes	nvarchar	-1	Yes	SMS short codes
channel_type	int	4	Yes	Type of channel used

77. ta_user_workspace_role

Description: Stores role assignments for users in workspaces.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the role assignment
user_account_id	int	4	No	Identifier of the user account
workspace_info_id	int	4	No	Identifier of the workspace
role_id	int	4	No	Identifier of the role
status	nvarchar	100	Yes	Status of the role assignment

78. ta_user_workspace_role_archieve

Description: Archives role assignments for users in workspaces.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the archived role assignment
user_account_id	int	4	No	Identifier of the user account
workspace_info_id	int	4	No	Identifier of the workspace
role_id	int	4	No	Identifier of the role
status	nvarchar	100	No	Status of the archived role assignment

79. ta_wallet_transactions

Description: Stores wallet transaction details.

Column Name	Data Type	Max Length	Is Nullable	Description

transaction_id	int	4	No	Primary key, unique identifier for the transaction
campaign_id	int	4	Yes	Identifier of the associated campaign
workspace_id	int	4	Yes	Identifier of the associated workspace
accountId	int	4	Yes	Identifier of the associated account
transaction_type	varchar	10	Yes	Type of transaction
transaction_date	datetime	8	Yes	Timestamp of the transaction
balance_before	decimal	9	Yes	Balance before the transaction
transaction_amount	decimal	9	Yes	Transaction amount
description	varchar	255	Yes	Description of the transaction

80. ta_webhook_conversations

Description: Stores webhook conversation details.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the conversation
message_id	varchar	255	No	Identifier of the message
sender_id	varchar	255	Yes	Identifier of the sender
message	varchar	255	Yes	Message content

81. ta_webhook_responses

Description: Stores webhook response details.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the response
message_id	varchar	255	No	Identifier of the message
conversation_id	varchar	255	Yes	Identifier of the conversation
recipient_id	varchar	255	Yes	Identifier of the recipient
campaign_id	int	4	Yes	Identifier of the associated campaign
sent_sts	bit	1	Yes	Sent status
delivered_sts	bit	1	Yes	Delivered status
read_sts	bit	1	Yes	Read status
daynumber	int	4	Yes	Day number in the campaign sequence

82. ta_whatsapp_account_details

Description: Stores WhatsApp account details.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the account
uwrId	int	4	No	WhatsApp user ID
wabaId	varchar	255	Yes	WhatsApp Business API ID
phoneId	varchar	255	Yes	Phone ID
lastUpdated	datetime	8	Yes	Timestamp of the last update

Column Name	Data Type	Max Length	Is Nullable	Description
createdDate	datetime	8	Yes	Timestamp when the account was created

83. ta_whatsapp_account_details_archive

Description: Archives WhatsApp account details.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	Yes	Identifier of the archived account
uwrId	int	4	Yes	WhatsApp user ID
wabaId	varchar	255	Yes	WhatsApp Business API ID
phoneId	varchar	255	Yes	Phone ID
lastUpdated	datetime	8	Yes	Timestamp of the last update
createdDate	datetime	8	Yes	Timestamp when the account was created

84. ta_workspace_billing_status

Description: Stores billing status for workspaces.

Column Name	Data Type	Max Length	Is Nullable	Description
workspace_id	int	4	Yes	Identifier of the workspace
workspace_name	nvarchar	510	Yes	Name of the workspace
billing_status	nvarchar	510	Yes	Billing status of the workspace
paireddate	date	3	Yes	Date when the workspace was paired

role	int	4	Yes	Role ID associated with the workspace
account_id	int	4	Yes	Identifier of the associated account

85. ta_workspace_billing_wallet

Description: Stores wallet details for workspace billing.

Column Name	Data Type	Max Length	Is Nullable	Description
id	int	4	No	Primary key, unique identifier for the wallet
workspace_id	varchar	255	Yes	Identifier of the workspace
workspace_name e	varchar	255	Yes	Name of the workspace
status	nvarchar	510	Yes	Status of the wallet
wallet_name	nvarchar	510	Yes	Name of the wallet
amount	nvarchar	510	Yes	Wallet balance
currency	nvarchar	510	Yes	Currency of the wallet
updated_by	datetime	8	Yes	Timestamp of the last update

86. ta_workspace_info_archieve

Description: Archives workspace information.

Column Name	Data Type	Max Length	Is Nullable	Description
workspace_info_id	int	4	No	Primary key, unique identifier for the archived workspace

personal_info_id	int	4	No	Identifier of the associated personal info
workspace_name	varchar	255	No	Name of the workspace
billing_country	int	4	Yes	Identifier of the billing country
workspace_industry	int	4	Yes	Identifier of the industry
workspace_type	int	4	Yes	Type of
